

**POLICY TYPE: EXECUTIVE EXPECTATIONS****POLICY TITLE: PARENTAL CHOICE**

---

It is the philosophy of the Board of School Trustees that parent(s) involvement in their child(ren)'s education is a strong indicator of student achievement. In support of this philosophy, the Superintendent is responsible for ensuring parental input is considered regarding, which District schools students attend, and which teachers provide instruction to students. The prudent use of District financial, physical and human resources may impose some practical restrictions to the policy.

In concert with this philosophy, it is understood that administrators are charged with maintaining the integrity of educational opportunities for ALL students in the District, when considering choice of school and individual classroom placements. It is further understood that multiple factors are considered in the constitution of a balanced school, classroom and grade level.

Within the aforementioned parameters, written parental requests for schools and teachers will be considered, provided a rationale is submitted with the request.
