

Personal Space

Everybody has their own bubble space.

People do not like when I am in their bubble space.

I can make sure I am not in other's bubble space by holding my arm in

front or beside me.

If I touch another person when I reach out means I am in their bubble space.

I need to move back or move my chair away from that person.

I can do this when I am in my classroom.

I can do this in line.

This will be good

I will be happy.

My teacher will be happy.
